Mold, Moisture and Money:

How to Secure Funding to Address and Prevent IAQ Issues

This 1-hour training on indoor air quality (IAQ) in schools—

- Conveyed how to build a system or program to secure sustainable funding for IAQ/moisture management, including how to develop short- and long-term goals and how to implement evaluation methods to capture return on investment.
- Outlined critical actions and proven Technical Solutions to prevent and manage mold and moisture issues.
- Prepared participants to use the electronic walkthrough assessment checklists in the School IAQ Assessment Mobile App and the *IAQ Tools for Schools* Action Kit guidance to identify, assess, document and prioritize mold and moisture issues in order to secure funding to address them.
- Demonstrated best practices from a model school district that engages stakeholders to successfully secure a variety of funding sources to support IAQ management costs.

Presented by the U.S. Environmental Protection Agency Indoor Environments Division
