## **Fresh Air: Optimal HVAC Management for Improved Health**

This 1 hour training:

- Showcased how real school districts are saving money and energy, as well as improving occupant health and performance through providing proper ventilation.
- Highlighted the importance of optimal HVAC design, operation and maintenance in providing clean and healthy air in schools.
- Described how to put in place key strategies for quality HVAC, including developing a plan to regularly inspect and maintain HVAC systems, as well as how to provide outdoor air in accordance with ASHRAE standards.
- Reviewed tools and guidance to inspect ventilation systems.

Presented by the School Health and Indoor Environments Leadership Development (SHIELD) Network
